ISBN: 978-3-96245-215-5

€58.00

Prices incl. VAT but exclude shipping costs

Rail freight traffic is a volatile market and, in terms of market participants, much more lively than, for example, long-term contracts, which are based on local rail passenger transport. The new business compendium "railfreight.eu" portrays 600 active freight railways in the well-known and standardized layout of the "Europäische Bahnen" (European Railways) reference book that has been published since 2007. In addition, the participants in the service areas of locomotive and wagon hire, rail forwarding are described and portrayed. An indispensable help for daily operation and detailed market research and observation. Bonus for free: The e-book-PDF of this book is available upon registration.
