€59.00

Prices incl. VAT but exclude shipping costs

"Improving Bridge Resource Management - Human Factors in Maritime Safety" is equally suitable for self-study and as a basis for BRM training. It is written with the nautical professional everyday life in mind and with the aim of raising awareness of the necessity and benefits of BRMs in general, as well as of the sector-specific risks of shipping and the requirements of BRM, offering action strategies and tools to avoid negative effects or to simplify and speed up procedures and decision-making processes, to provide concrete recommendations for managers, teams, individuals and trainers to promote this tool and integrate it into everyday life on board. The maritime industry still lacks a standardisation of the exact contents and methods how crews should be trained especially in Bridge Resource Management (BRM) and human factors. Obviously, the international committees are building on the shipping companies' own responsibility and safety culture. The practice-oriented book "Improving Bridge Resource Management" contributes to closing this gap: It deals with the causes of accidents in the "safety industry" of shipping, presents sources of error and potential risks and shows what bridge resource management training should...
